

# BODY WASH

---

## FORMULATION OVERVIEW

Proper cleansing after a sunless spray tan session will help ensure even fading and the longest lasting, most natural looking color. This body wash is different than other soaps because it does not contain harsh detergents that will strip your skin and fade your tan rapidly. This formulation excludes heavy alcohol and mineral oil, both of which aid in removing the skin of its nutrients.

**HOW TO USE:** Sjolie Body Wash is a specially designed sunless tanning body cleanse containing moisturizing agents that leave skin clean, hydrated, and healthy to prolong a tan. This body wash is formulated to keep from stripping the skin of its natural components while extending the developed color from DHA.

**PRO-TIPS:** While this Body Wash is ideal for use after a spray tan, it is also perfect as a stand-alone product and can be used as a daily body wash.

## HIGHLIGHTED INGREDIENTS

### COCONUT OIL

A rich source of fatty acids to help enhance the skins texture and moisture levels.

### RETINYL PALMITATE

Also found naturally in the skin, works as an antioxidant mainly helping to protect the skin from UV light exposure.

### CITRIC ACID

Derived from citrus and used to adjust the pH levels of the skin to promote quicker cell turn over for anti-aging benefits.
