

# BRONZE FUSION GEL

---

## FORMULATION OVERVIEW

This lightweight and soothing self-tanning gel provides simple, quick and lasting color. Micro-spheres burst as it is massaged into the skin providing fresh, instant color. Bronze Fusion contains 8% DHA and 100% premium color correcting ingredients. You can also mix into a daily moisturizer. This gel is also ultra-hydrating for the skin but absorbs quickly. Unlike most self-tanners on the market, the Bronze Fusion allows for the user to get dressed just minutes after application. While the color is instant, it will also continue to develop due to the 8% DHA.

**HOW TO USE:** This product may be used on its own to enhance skin tone, or over a spray tan for a deeper, longer lasting tan.

With hands or a mitt, apply gel to desired areas in an even, circular motion. Allow 6-8 hours before showering for full development. Thoroughly wash hands after application.

**PRO-TIPS:** Apply with daily moisturizer for easier application.

## HIGHLIGHTED INGREDIENTS

### BRONZE MICRO SPHERES

Provides immediate bronze color.

### GREEN TEA AND CUCUMBER EXTRACT

Softens, revitalizes and promotes healthier skin.
