

ICON RESERVE: ULTRA ONE

OLIVE UNDERTONES | ALCOHOL BASED | 2-4 HOUR DEVELOPMENT

FORMULATION OVERVIEW

Ultra One Rapid Tan is excellent for clients who need a rushed tan. The quick drying formula will help anyone achieve their tanning goal with minimal time. This solution is not intended to stay on longer than the recommended 4-5 hours.

HOW TO USE: Apply pH Balancing Spray and Barrier Cream. For a full-body tan, use 2 oz. of solution per client. Increase as needed. Apply 1-coat of solution, and do not oversaturate. Increase DHA % to darken tan results, do not layer.

PRO-TIPS: Technicians should remind clients of the importance of hydrating and moisturizing. Because of the alcohol content, clients may experience a quicker fade or uneven complexion. Hydration with Tan Extend and proper moisturizers will improve the tan longevity and prevent from uneven fade.

HIGHLIGHTED INGREDIENTS

CETEARETH-20

Derived from a blend of Cetyl and Stearyl alcohols from coconut oil; used as an emulsifier.

GLYCERIN

Comes from natural fats and oils such as vegetable oil. Used as a humectant, emulsifier and skin softener.

WALNUT EXTRACT

Derived from the walnut husk; commonly used for acne treatments and as a skin soother. The husk also provides natural coloring. *Note:* Because the nut is not being used (only the husk), MOST of the time this will not affect clients with nut allergies. The client should always consult their doctor if there are hesitations in using products with questionable ingredients.
