

LUXE ULTRAVIOLET

VIOLET UNDERTONES | ALCOHOL BASED | 2-4 HOUR DEVELOPMENT

FORMULATION OVERVIEW

This solution is a one-of-a-kind rapid rinse, violet based solution. It is perfect for any skin type, year-round. Similar to our Original Ultra-One, this solution's color will rely on the length it is worn before deactivating the DHA with a warm-water rinse. This formulation is an 18% DHA! We discourage technicians from recommending sleeping in this solution or wearing beyond 4-hours to avoid over-developing.

HOW TO USE: Apply pH Balancing Spray and Barrier Cream. For a full-body tan, use 2 oz. of solution per client. Increase as needed. Apply 1-coat of solution, and do not oversaturate. Increase DHA % to darken tan results, do not layer.

PRO-TIPS: Technicians should remind clients of the importance of hydrating and moisturizing. Because of the alcohol content, clients may experience a quicker fade or uneven complexion. Hydration with Tan Extend and proper moisturizers will improve the tan longevity and prevent from uneven fade.

SUITABLE SKIN TYPES

ALL SKIN TYPES

FORMULA DEVELOPMENT

2-hours- Light tan, 6% DHA

3-hours- Medium tan, 9% DHA

4-hours- Dark tan, 12% DHA

HIGHLIGHTED INGREDIENTS

ETHOXYDIGLYCOL

Superior solubilizer and efficacy booster for cosmetic formulations. Also improves color fixation of self-tanning products that contain DHA.

CETEARYL ISONONANOATE

Used to help soften the skin. Also aids in soothing and healing for dry skin.

CETEARETH-20

A fatty alcohol which is used as an emollient and emulsifier to reduce surface tension.
