

OPALESCENT SHIMMER DROPS

FORMULATION OVERVIEW

The Shimmer additives provide a glowing effect to the skin. The Opalescent Shimmer Drops will add a hint of color and shimmer to your sunless spray tan.

HOW TO USE: Add two full droppers of shimmer to every 1 ounce of spray tan solution or distilled water for a shimmer only service. Add additional droppers for increased shimmer benefits.

Shimmers are a temporary additive and will not last the duration of the spray tan.

Opalescent Shimmer is beautiful on all skin types, however it is more prevalent on lighter skin tones.

PRO-TIPS: Add Opalescent Shimmer to your client's favorite quality moisturizer (such as Sjolie Tan Extend), to prolong the glowing effects even after spray tan has faded. Or add Opalescent Shimmer drops to your makeup and use as a liquid highlighter.

HIGHLIGHTED INGREDIENTS

ALOE VERA LEAF EXTRACT

Comes from a versatile plant that has been found to reverse degenerative skin changes by stimulating collagen and elastin synthesis. Acts as a biological vehicle to aid penetration and absorption of other bio-active ingredients into the skin.

GLYCERIN

Comes from natural fats and oils such as vegetable oil. Used as a humectant, emulsifier and skin softener.
