

SKIN PERFECTING LOTION

PROFESSIONALS

MSRP \$40.00

PRO \$12.00

FORMULATION OVERVIEW

This self-tanning hybrid will perfect and firm your skin while naturally derived DHA develops a gradual glow. Not only does the Skin Perfecting Lotion contain naturally sourced DHA, but this formula also includes Caffeine Extract, Kukui Nut oil, and Niacinamide to promote the appearance of smooth skin, provide skin hydration, and restore dull or aging skin.

HOW TO USE: Because of its DHA content (6%), the Self-Tanning Lotion should be used sparingly. Self-Tanning Lotion is designed for weekly use and can be applied every 2-3 days for optimal results. When using in conjunction with a spray tan, ideally, use when the spray tan has shown significant signs of fading. Using the Self-Tanning Lotion over freshly applied spray tan is unnecessary.

PRO-TIPS: Apply liberally to clean skin post-shower; with hands or mitt, rub evenly and in circular motions where color is wanted. Clients should thoroughly wash hands immediately after use.

HIGHLIGHTED INGREDIENTS

DIHYDROXYACETONE

Known as DHA, is derived from sugar beets and sugar cane. DHA reacts with the amino acids in dead skin cells to produce pigment.

KAKUI NUT OIL

Contains essential fatty acids that help the body retain water and cleanse the skin. Helps to reduce appearance of cellulite.

NIACINAMIDE

skin restoring ingredient that offers multiple anti-aging benefits such as improving appearance of large pores, uneven skin tone, fine lines and dullness.
