## PROFESSIONALS

MSRP \$10.00

PRO \$8.00

## FORMULATION OVERVIEW

Deep clean your applicator with the help of SJOLIE Spray Gun Cleaning Solution. This solution will break down the leftover residue or buildup that is in your applicator. Your applicator will last longer and work more efficiently when using this on a routine basis.

**HOW TO USE:** Pour 2-3 oz. of warm water into a bowl and mix with 2-3 oz. of gun cleaning solution. Next, take apart your applicator by first unscrewing the Solution Screw, Spring, and Needle. Then remove all other removable parts including the Air Cap, Gland Nut, and Lid Assembly. Soak all parts in the bowl with water and Gun Cleaning Solution for a couple of minutes. Scrub and clean parts with a brush, pat or air dry and reassemble. For parts that require more cleaning due to buildup, soak for a longer period of time.

**PRO-TIPS:** We suggest doing a routine deep clean every 3 months depending on the volume of your clientele.

## HIGHLIGHTED INGREDIENTS

### DEIONIZED WATER:

Ultra purified water through the process of deionization. Mineral ions such as sodium, calcium, iron, copper, chloride and sulfate have been removed.

### DISODIUM COCOAMPHODIACETATE BETAINE:

Non-toxic and biodegradable with an excellent toxicological profile. Derived from Coconut.

### SDA 40B ALCOHOL:

Ethyl alcohol, used as an astringent and solvent.
