COST PER USE \$0.08

FORMULATION OVERVIEW

Improve the outcome of the spray tan by prepping with SJOLIE pH balancer. SJOLIE pH Balancer acts as an astringent by bringing the pH of the skin to ideal levels for proper DHA absorption.

HOW TO USE: Apply the pH Balancing over the face and body. Ensure the solution is fully absorbed before performing the spray tan. We suggest you use your turbine hose to completely dry the body beforehand.

TECHNICIAN TIP: When spraying a client with large or open pores, we recommend storing your pH balancing spray in the fridge beforehand. The temperature of the pH will “shock” the pores, which will allow for an even surface for application.

HIGHLIGHTED INGREDIENTS

WITCH HAZEL EXTRACT:

Double distilled from the leaves, bark and twigs of the witch hazel tree. Used as an astringent, anti-inflammatory, soothes and heals. Natural toner to tighten the pores.

ARNICA EXTRACT:

An astringent (a solution that removes oil from the skin) and to treat skin disorders. It has anti-inflammatory and soothing properties.

CITRIC ACID:

Derived from citrus and used to adjust the pH levels of the skin to promote quicker cell turn over and anti-aging benefits.

BUTYLENE GLYCOL:

Used as a natural preservative, solubilizer (dissolves other ingredients) and humectant (retains moisture).
