

EDUCATION BLEND-NON DHA

PROFESSIONALS

MSRP \$20.00

FORMULATION OVERVIEW

Sjolie Training Solution is developed for new spray tan business operators and technicians looking to perfect their technique. This formula is designed without DHA, so there will be no developed color after the initial rinse. The solution contains natural bronzers to act as a color guide, so technicians can practice until ready to use a solution containing DHA.

HOW TO USE: Clean and prep the body before spraying. Provide the client with the appropriate protective gear such as nose plugs, sticky feet, protective goggles, disposable panties, and hair net. It is recommended that you use our Sjolie Sunless Barrier Cream and PH Balancing prep spray before applying any of our sunless tanning solutions. You are now ready to begin your Spray technique!

HIGHLIGHTED INGREDIENTS

ALOE LEAF EXTRACT

It comes from a versatile plant that has been found to reverse degenerative skin changes by stimulating collagen and elastin synthesis. Acts as a biological vehicle to aid penetration and absorption of other bioactive ingredients into the skin.

GLYCERYL STEARATE

Derived from vegetable fatty acids helps to soothe and soften the skin. Also, used as an emulsifier.

TOCOPHEROL ACETATE (VITAMIN E)

Used as a stabilizer and emulsifier.

COLOR SCALE NO DEVELOPED COLOR
